

# INSTALLATION OF R-290 FRONT MOUNTING KIT 2014 - 2018 RAM 2500/3500 4x4/4x2

# INSTALLATION SAFETY PRECAUTIONS

## If any installation/operation problems are encountered, please call G&B Specialties, Inc. for technical assistance before continuing with the installation process.

•

- Failure to heed to any of the following warnings could result in severe bodily injury and/or equipment damage.
- Read and understand this manual completely before attempting installation of the equipment.
- Installation instructions provided below only address the RAFNA railgear equipment. Applicable railway company procedures and policies must be adhered to.
- Before performing any work under the vehicle or railgear, ensure the engine is turned off and the parking brake is set.
- Do not start the vehicle with the power steering hoses disconnected. Reconnect all hoses and secure the power steering cooler if the vehicle is started.
- Ensure all removed components are given to the vehicle owner after the installation of the railgear. These components must be re-installed if the railgear is removed from the vehicle.
- Always disconnect the vehicle's battery when welding on the vehicle or railgear to protect the vehicle's electrical system.
- Railway Company rules governing rail travel must be observed at all times.
- Never operate the vehicle if the Gross Vehicle Weight Rating (GVWR), Gross Axle Weight Rating Front or Rear (GAWR), or the wheel or tire load ratings are exceeded.

# INSTALLATION OF FRONT MOUNTING KIT

The following procedure details the installation of the front mounting kit. The hardware required for this installation is listed in Table 1.

| 1            |  |     |
|--------------|--|-----|
| Part Number  | Description                            | Qty |
| R-31270D     | Mounting Bracket, Drivers Side         | 1   |
| R-31270P     | Mounting Bracket, Passengers Side      | 1   |
| R-31276D     | Outer Support Plate, Drivers Side      | 1   |
| R-31276P     | Outer Support Plate, Passengers Side   | 1   |

|              | 3/4" UNC Gr. 8 Nylon Insert Lock Nut   | 4   |

#### Table 1: Front Mounting Kit Installation Parts

Drivers Side Bracket Installation

- 1. Remove the front bumper and bumper mounting brackets attached to the vehicle frame. Retain the front bumper, brackets and hardware for re-installation. (if required)
- 2. Remove tow hooks. Tow hooks will not be re-installed
- 3. Place the driver's side mounting bracket against the bottom and inside of the frame and place the 1/2" supplied hardware through the brackets and frame at the existing bumper bracket mounting holes.
- 4. Place the driver's side outer support plate against the outside of the frame, making sure it wraps around the bottom of the frame and drivers side mounting bracket. Secure to frame with the hardware used in step #3. Making sure both brackets are tight against the inside outside and bottom of frame. Torque to 100 ft/lbs dry. Do not over torque.
- 5. Secure both brackets together at the overlap on the bottom of the frame with the supplied 1/2" hardware. Torque to 100 ft/lbs dry. Do not over torque.

G&B Specialties Inc. 535 West 3<sup>rd</sup> Street, Berwick, PA, USA Tel: (570) 752-5901 Fax: (570) 752-6397 US Field Service: 570-441-6988; CAN Field Service 570-854-0482; www.rafna.com

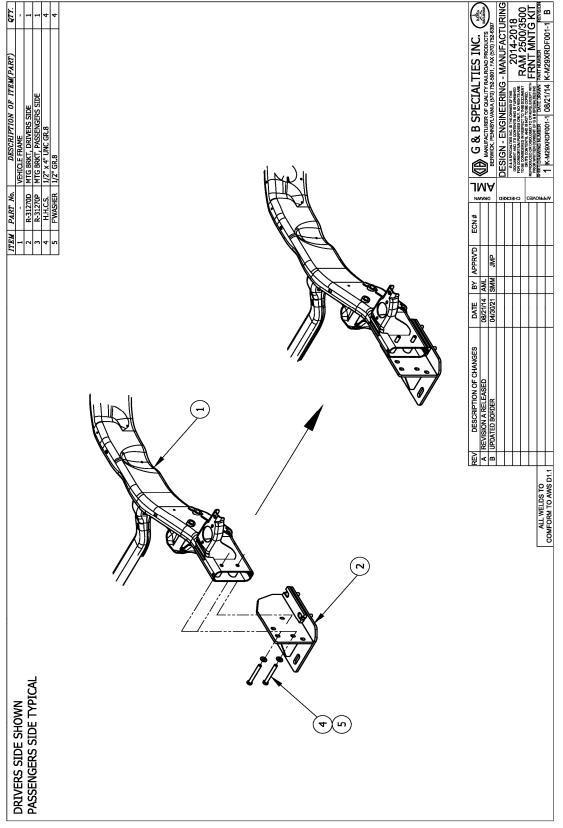

- 6. Using the rear upper hole in the outer support plate as a guide, drill a 17/32" diameter hole thru the frame and mtg bracket. Secure to frame using the supplied 1/2" hardware. Torque to 50 ft/lbs dry. Do not over torque.
- 7. Place the bracket spacers between the mounting bracket and outer support plate and secure with the supplied 1/2" hardware. Torque to 100 ft/lbs dry. Do not over torque.
- 8. Repeat above steps for the passenger's side.

#### Note:

*Make certain everything sits flush against the frame when tightening the fasteners.* 

- 9. If the vehicle's original front bumper is to be re-installed in its original position, it will need to be modified and reinforced as required by the installer. The recommended modifications are shown at the end of installation section of this manual.
- 10. Optional bumper mounting plates are supplied with this mounting kit and can be used at the installer's discretion. The mounting plates attach to the mounting bracket and outer support plate and are intended to reuse the OEM bumper mounting bracket and OEM hardware.

# **OPERATION SAFETY PRECAUTIONS**

•

## If any installation/operation problems are encountered, please call G&B Specialties, Inc. for technical assistance before continuing with the installation process.

- Failure to heed to any of the following warnings could result in severe bodily injury and/or equipment damage.
- Read and understand this manual completely before attempting operation of the equipment.
- Operation instructions provided below only address the RAFNA railgear equipment. Applicable railway company procedures and policies must be adhered to.
- Before performing any work under the vehicle or railgear, ensure the engine is turned off and the parking brake is set.
- Always disconnect the vehicle's battery when welding on the vehicle or railgear in order to protect the vehicle's electrical system.
- Failure to heed to any of the following warnings could result in severe bodily injury and/or equipment damage.
- Railway company rules governing rail travel must be observed at all times.
- Never operate the vehicle if the Gross Vehicle Weight Rating (GVWR), Gross Axle Weight Rating Front or Rear (GAWR), or the wheel or tire load ratings are exceeded.

# **OPERATION OF FRONT MOUNTING KIT**

With the front mounting kit installed on this vehicle, it may be operated as normal, however the mounting plates are located further forward than the front bumper. Caution must be used when operating the vehicle.

Never operate the vehicle if the Gross Vehicle Weight Rating (GVWR), Gross Axle Weight Rating Front or Rear (GAWR), or the wheel or tire load ratings are exceeded.

#### SERVICE OF FRONT MOUNTING KIT

The front mounting kit must be serviced regularly to avoid damage to the equipment. Table 1 below provides the Recommended Service Schedule and Table 2 provides Standard Fastener Torque Values.

| Service Required   | Initial 100 km<br>(62 Miles) of<br>road and/or<br>rail use | Daily        | Weekly | Monthly |  |
|--|--|--------------|--------|---------|--|
| Inspect front mounting kit fasteners (re-torque if required) |  | $\checkmark$ | ✓      | ✓       |  |
