

RAFNA Aluminum Hi-Rail Rims

Description:

G&B Specialties is proud to offer a custom Aluminum Rim package for the 250/2500 models, along with the 350/3500. Rims can be ordered individually, and in sets of 4 or 5. The rims are forged from 6061-T6 Aluminum, and carry a load rating of 3500 pounds. The rims are a direct bolt on and do not require an adaptor to achieve proper track width. The rims were designed to use OEM Tire Pressure Sensors without any modifications needed. The rims furnish a Bright Face Machined finish, and are protected by a custom sealing process. All rims are DOT approved, and have received rigorous testing to ensure proper life and function.

Benefits:

- Reduces Over-All Truck Weight Allowing for More Payload
- No Modifications Needed to Install
- Re-Uses OEM Lug Nuts and Torque Spec.
- Improved Tire Life and Ride Quality
- Increased Driver Comfort
- Easy to Clean
